

Car Cloth

Item # 305100

PROBLEM : Getting your car clean and shiny without scratching can be a challenge. In addition, many of today's popular glass and window cleaners contain harmful chemicals. And using paper towels to clean just adds to the problem of overloaded landfills and deforestation.

SOLUTION : The Car Cloth is designed to get your car's windows and other surfaces clean and streak-free without scratching, using just water. No harmful chemicals are washed into storm drains and no paper towels are needed, which saves you money and means a healthier environment.

Description:

In conjunction with our Car Wash Mitt, our Car Cloth gets your car sparkling clean with only water. The Car Cloth's extremely fine fibers are tightly woven, which helps prevent the cloth from holding dirt that may scratch your vehicle, so it quickly dries and polishes your entire car, including windows, mirrors, glass, chrome and other smooth or shiny surfaces.

Size: 65cm x 50cm / 25.59" x 19.69"

Key Features:

- Constructed of extremely fine, tightly woven Norwex Microfiber
- Can be folded to create multiple surfaces for nonstop cleaning and polishing

Key Benefits:

- Save money by using only water
- Save money and protect the environment by eliminating the need for chemicals or paper towels
- No more streaks
- Car stays shiny and repels dust and dirt longer.
- Tightly woven fiber helps prevent paint from scratching.
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products
- Used dry, it creates static electricity that lifts the smallest particles of dust and dirt up into the cloth and prevents them from resettling back onto surfaces.
- Dries quickly so it's ready to use when you are

How to Use:

- Use the Car Cloth for drying and polishing after normal washing with the Car Wash Mitt.
- Dry surfaces quickly with Car Cloth before water evaporates. Preferably wash your car out of direct sunlight or in the cool of the day.
- Use slightly damp on car windows, mirrors, chrome and other smooth surfaces.
- Slightly dirty microfiber can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering. Rinse thoroughly after washing and air or machine dry.
- Cloths that have been used heavily should be laundered using Norwex Ultra Power Plus™, which contains no fillers, after each use. Do not use bleach, fabric softeners or dryer sheets.

Demo Tips:

- Use the Car Cloth alone or with a Spray Bottle filled with water. Demo in bright sunlight on a dusty mirror or window, bringing the glass to a high shine.
- Wet a handheld mirror and let it air dry. Then use the Car Cloth to show how easy it is to get it spot-free and shiny.

Did You Know?

- Most cars are continually bombarded with contaminants. Dirt, tree saps, smog, salt and bird droppings can all affect the beauty and proper functioning of a vehicle if it isn't cleaned regularly.
- How often should you wash your car? Various factors come into play, including the location, the size of the car, the climate of the area you live in, how often you use your car and whether it's kept in a garage or outdoors. In general, it is recommended that cars be washed at least once a week.
- Because water droplets can collect dirt at their base and leave behind ugly streaks on the newly cleaned surface, it's important to dry your car quickly after washing it.

All Norwex Microfiber products carry a two-year warranty. Please visit www.norwex.com for complete details.
