

Magnetic EnviroCloth™

Item #: 300104

PROBLEM : You rely on your Norwex EnviroCloth everywhere, every day—in the kitchen, wiping the little ones' messes, around the house, and even in the garage or on the patio. It comes in handy for so many situations. The only thing that could make it better is to somehow ensure that it's always within reach.

SOLUTION : The new Magnetic EnviroCloth has all the great features of our now better-than-ever Norwex antibacterial Microfiber, so you can use it just about anywhere, any time, for any clean up. Best of all, it now has a strong magnet in the corner of the cloth to keep it handy 24/7.

Norwex Microfiber has the ability to remove up to 99% of bacteria from a surface when following the proper care and use instructions.

Description:

What could make the Norwex EnviroCloth even better? How about a built-in magnet so you can hang it where you need it—on your refrigerator, oven or any metal surface. The strong magnet holds the cloth in place, and the super-absorbent, BacLock™ Microfiber is great dry or wet for cleaning, wiping up spills and so much more.

27 cm x 50 cm / 10.6" x 19.7"

Key Features:

- Norwex Microfiber has the ability to remove up to 99% of bacteria from a surface when following the proper care and use instructions.
- Contains our exclusive BacLock* agent
- Built-in magnet holds towel in place.
- Made with fiber that has a maximum length of more than 10 million feet (3 million meters) for more effective cleaning power
- Can be used dry for dusting, or wet for general cleaning and heavily soiled areas

Key Benefits:

- Strong magnet makes it easy to hang on any metal surface—refrigerator, stove, stroller handle, tool boxes, fitness equipment.

- Removes EVERYTHING from all surfaces.
- Saves time and money by using only water; no need for harmful chemicals
- Eliminates the need for paper towels, creating less waste and less paper dust in the home
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products
- Traps dust and grime in the cloth and leaves surfaces cleaner, so you won't have to clean as often
- Used dry for dusting, it creates static electricity that lifts the smallest particles of dust and dirt up into the cloth and prevents them from resettling on surfaces.
- Used damp for general cleaning and heavily soiled areas, it picks up everything using water.
- Cleans any surface that would normally be cleaned with soap and water
- BacLock*, the micro silver agent in the cloth, goes to work with self-purification properties against mold, fungi and bacterial odor within 24 hours so that it is ready to use again.

Care and Use:

- Use dry to attract dust and dirt particles, and wet to wipe away dirt and debris from all washable surfaces using only water.
- Fold the cloth so you have eight clean sides to work with. Wipe with even strokes.
- Slightly dirty microfiber can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering. Rinse thoroughly after washing and air or machine dry.

- Cloths that have been used heavily should be laundered using Norwex Ultra Power Plus™, which contains no fillers, after each use. Do not use bleach, fabric softener or dryer sheets.
- For deep, stubborn stains or odors, microfiber can be boiled in a glass pan or pot for 10 minutes to allow fibers to swell and release the debris. You may also pour boiling water over the cloth in a Pyrex® bowl. Let sit and then wash as usual.

Demo Tips:

- Hang in your Host's kitchen to display during the party.
- Let guests have fun sticking the cloth to various metal kitchen appliances.

Did You Know?

- Most magnet-friendly, big kitchen appliances have a thin sheet of stainless steel as a decorative face over a metal core that's more ferromagnetic—meaning a metal that magnets will stick to.

All Norwex Microfiber products carry a two-year warranty. Please visit www.norwex.com for complete details.

*Contains BacLock, an antibacterial agent for self-cleansing purposes only. The agent is solely designed to inhibit bacterial odor, mold and/or mildew growth within the product.
