

Cutting Board

Item #: 370001

PROBLEM : You want to safely prepare your fruits, meats and vegetables but plastic boards stain quickly, dull your knives and can be pierced and scuffed easily, allowing your board to potentially harbor dangerous bacteria. Standard wood boards are often difficult to maintain, and they can't go in the dishwasher.

SOLUTION : Reduce your plastic use and recycle your old, plastic cutting board—instead, use the new Norwex Cutting Board and conveniently cut, chop, slice and dice your way to a delicious meal, every time!

Description:

Help reduce plastics in the kitchen by ditching your plastic cutting board. Molded from natural Rice Husks, the Norwex Cutting Board is the essential kitchen tool! It's made from biodegradable materials, it's easy to clean, and has an extremely durable composition to protect your counters from knife damage. It's a great alternative to plastic cutting boards and features a silicone grip ring beneath the board to keep it in place while you safely cut and prepare your food.

Size: 35 x 25 cm / 13.8" x 9.8"

Free From:

- Toxic byproducts
- Harmful substances such as melamine
- Heavy metals
- Non-toxic
- BPA-free

Features and Benefits Your Customers Will Love:

- Helps to protect counters from knife damage.
- Does not pit and scuff from knife use like plastic cutting boards.
- Silicone grip ring ensures board stays in one place.
- Made from biodegradable materials.
- Dishwasher safe.

Suggested Use:

- Place the Cutting Board on a stable kitchen surface.
- After use, remove all food particles and other residues.
- Scrub with hot, soapy water and allow the board to completely dry before storing.

Demo Tips:

- Let the Host use the Cutting Board as a serving tray for simple party snacks.
- Bring guests into the kitchen and demonstrate how easy it is to cut a piece of fruit or a vegetable on the Cutting Board.
- Pass it around to each guest so they can feel how lightweight and sturdy it is.

Did You Know?

- Rice Husks have so many incredible uses! In fact, it can be used as biomass fuel, and some power plants in Asia are powered completely by 100% ground Rice Husk.
