

Reusable Wet Wipes Bag

Item #: 360100

PROBLEM : While disposable wet wipes are convenient to quickly get dirty hands, faces and baby bottoms clean, many are filled with toxic chemicals and nearly all of them wreak havoc on our environment. They clog sewer systems when flushed, and can wind up on beaches and in waterways, too.

SOLUTION : Go green with the Norwex reusable solution—our eco-friendly Reusable Wet Wipes Bag. It's perfect for carrying unused dry cloths as well as wet used cloths on the go, and cleans up easily once you get home.

Travel Pack sold separately.

Description:

Convenient, cost-effective and eco-friendly, this water-resistant, two-pocket bag is your reusable, on-the-go solution to carry personal-use Norwex Microfiber Cloths, dry or wet, any time, anywhere. It conveniently stores dry, unused Makeup Removal Cloths or Baby Body Cloths in the front pocket. Use the larger pocket for wet or used items.

13 cm x 25 cm / 5.3" x 9.8"

Key Features:

- Two pockets to hold dry and wet cloths
- Perfect size to carry in a purse, backpack, glove compartment or diaper bag
- Made from 100% cotton
- Pockets are zippered to prevent leakage.
- Large pocket is lined with water-resistant PEVA to hold wet cloths.

Key Benefits:

- Reusable and cost-effective
- Convenient, eco-friendly solution for on-the-go lifestyles
- Machine-washable for easy cleanup

How to Use:

- Use the front pocket for dry or unused items, and the larger pocket for wet or used items.
- Machine-washable. Hang to dry.

Demo Tips:

- Pass it around for guests to feel the material and get a look at the roomy pockets.
- Place the Baby Body Cloth or a Makeup Removal Cloth in the front pocket to show guests that it's the perfect size.
- Point out that the Reusable Wet Wipes Bag is great for travelling, especially with small children.

Did You Know?

- Wet wipes are one of the most common consumer items in our landfills, making up 30% of non-biodegradable waste.
- Sewer systems in North America and elsewhere are being strangled by "flushable" wipes. Blocked sewers can affect waterways when they overflow into rivers and oceans, impacting marine life and ecosystems.
- A British study found a 50% increase in the accumulation of wet wipes on the country's beaches in one year.
- Typical antibacterial wet wipes can also harbor hundreds of untested chemicals in the form of fragrances.
- PEVA (polyethylene vinyl acetate) is a non-chlorinated vinyl alternative to PVC.

1-year warranty
